Full-Stack Developer with experience across the full development lifecycle – from system design and development through deployment and production operations. Skilled in building and maintaining high-traffic web applications, covering Frontend, Backend, and Cloud Infrastructure.

EXPERIENCE

Infogrammer

June 2024 – Present

Senior Full-Stack Developer

- Developed and maintained a food ordering platform processing 6-figure daily orders and millions of requests per day
- Developed a backoffice system for managing merchant data including full CRUD operations for restaurant and menu configurations
- Developed an internal admin tool for support and development teams to manage platform operations and configurations
- Developed full-stack systems using Next.js, Vue.js, and .NET MVC on the frontend. ASP.NET, Node.js, and Go on the backend
- Led migration of legacy .NET MVC to Next.js in a live production environment
- Designed and implemented POS system integration with the core food ordering platform
- Managed cloud infrastructure on Azure and AWS, including server provisioning, monitoring, and CI/CD pipelines
- Worked across relational and non-relational databases for PostgreSQL, MySQL, MongoDB, and Redis

Freelance

August 2024 – January 2025

3D Building Visualization & Sensor Dashboard

- Developed an interactive 3D building model viewer with sensor data dashboards, using Next.js, Three.js, R3F, and Express.js
- Supported drill-down views from campus-wide overview to individual rooms with auto-refreshed sensor metrics
- Developed full CRUD admin panel for managing buildings, floors, rooms, and sensor configurations

Appintouch

June 2023 – October 2023

Full-Stack Developer Intern

- Developed a document management web application for accounting workflows using Angular and ASP.NET

CME_x

November 2020 – December 2020

Full-Stack Developer Intern

- Developed a hospital management module for internal operations using PHP

PROJECTS

Finjar | Next.js · Rust (Axum)

- Built a personal finance platform for recording income, expenses, recurring transactions, budgets, and financial plans.
- Developed server-authoritative forecasting and monthly financial review features with billing-cycle comparisons, immutable report snapshots, and multi-currency support.
- Integrated AI chat with internal financial APIs to generate context-aware, explainable financial insights and recommendations.

hqr-generate | Rust · JavaScript | Open Source

- Open-source QR code generation library for React.js built to explore the Rust ecosystem

EDUCATION

Payap University

2021 – 2024

Bachelor of Business Administration, Major in Software Engineering

Lanna Polytechnic College

2019 – 2021

High Vocational Certificate in Information Technology

TECHNICAL SKILL

Frontend: TypeScript · Tailwind · Three.js · Next.js · React · .NET MVC · Vue.js · Angular

Backend: C# (ASP.NET) · Node.js · Rust · Go · REST · gRPC · MQTT

Databases: PostgreSQL · MySQL · MSSQL Server · MongoDB · Redis

Infrastructure: Docker · Azure · AWS · Microservices · CI/CD Pipeline

Tools: Git · Claude · Codex
