Full-Stack Developer experienced in designing, building, and maintaining high-traffic web applications from concept to production. Strong background in full-stack development, cloud infrastructure (Azure & AWS), payment gateway integration, and modernizing legacy systems with scalable architectures.

EXPERIENCE

Infogrammer **June 2024 – Present**
Senior Full-Stack Developer

- Developed and maintained a high-traffic food ordering platform processing 6-figure daily orders and millions of requests
- Migrated a legacy .NET MVC food ordering platform to Next.js with minimal production impact
- Modernized a legacy Vue 2-based HQ management platform for reporting, merchant configuration, and multi-store operations by migrating it to React
- Built merchant backoffice and internal administration tools to streamline restaurant management and operational workflows
- Designed and implemented POS integrations between restaurants and the online ordering platform
- Designed and implemented integrations with multiple payment gateways, supporting PromptPay QR, Credit Card, Installment, Refund, and Void transactions
- Developed scalable full-stack applications using Next.js, Vue.js, ASP.NET, Node.js, and Go
- Managed cloud infrastructure on Azure and AWS, including CI/CD pipelines, monitoring, and deployment automation
- Optimized data access across PostgreSQL, MySQL, MongoDB, and Redis

Freelance **August 2024 – January 2025**
3D Building Visualization & Sensor Dashboard

- Developed an interactive 3D building model viewer with sensor data dashboards, using Next.js, Three.js, R3F, and Express.js
- Supported drill-down views from campus-wide overview to individual rooms with sensor metrics

Appintouch **June 2023 – October 2023**
Full-Stack Developer Intern

- Developed a document management web application for accounting workflows using Angular and ASP.NET

CMEx **November 2020 – December 2020**
Full-Stack Developer Intern

- Developed a hospital management module for internal operations using PHP

PROJECTS

Finjar | Next.js · Rust (Axum)

- Designed and developed a personal finance platform for budgeting, expense tracking, recurring transactions, and long-term financial planning
- Designed and built a server-authoritative financial engine supporting recurring transactions, budgeting, financial forecasting, and immutable historical snapshots
- Integrated LLM-powered AI using RAG and internal financial APIs to deliver personalized, context-aware financial insights and recommendations

EDUCATION

Payap University **2021 – 2024**
Bachelor of Business Administration, Major in Software Engineering

Lanna Polytechnic College **2019 – 2021**
High Vocational Certificate in Information Technology

TECHNICAL SKILL

Frontend: TypeScript · Tailwind · Three.js · Next.js · React · .NET MVC · Vue.js · Angular
Backend: C# · .NET · Node.js · Rust · Go · REST · gRPC · MQTT
Databases: PostgreSQL · MySQL · MSSQL Server · MongoDB · Redis
Infrastructure: Docker · Azure · AWS · Microservices · CI/CD Pipeline
Tools: Git · Claude · Codex
